

SupraScan Quartz A1 Metamorfoze compliance

Metamorfoze guidelines

Metamorfoze Preservation Imaging Guidelines are specifications for technical criteria and tolerances for preservation imaging.

Metamorfoze guidelines describe three levels for image quality inspection:

- "Metamorfoze": specifications for digitizing works of art
- "Metamorfoze Light": specifications for digitizing documents such as books, maps, newspapers, periodicals, manuscripts ...
- "Metamorfoze Extra Light": specifications for digitizing bitonal books only

SupraScan Quartz A1 compliance with Metamorfoze guidelines

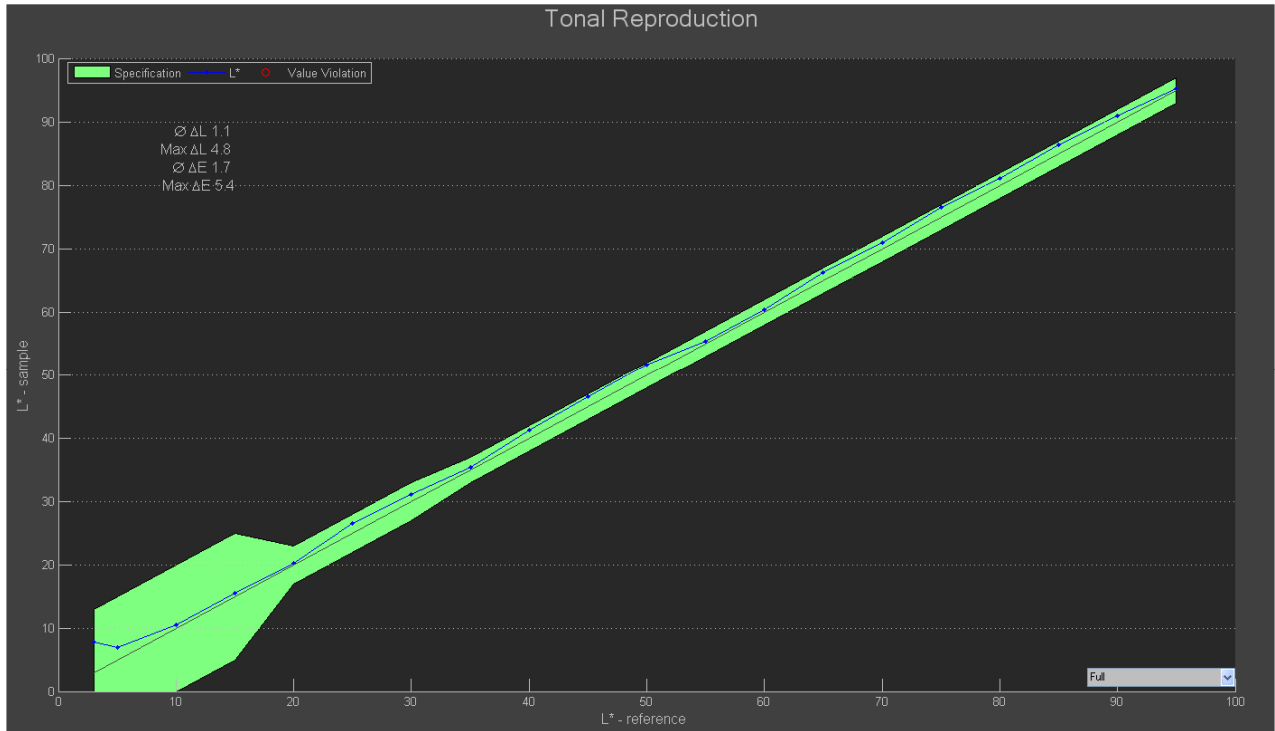

By the following results, we confirm that SupraScan Quartz A1 is fully compliant with "Metamorfoze" guidelines. These results have been achieved working with the standard DigiBook software and with Profile Maker modules to create the scanner ICC profile. All criteria and specifications are correctly reached!

Print screens of this document come from iQ Analyser software used with the UTT test chart (Universal Test Target). The green area of the graphics indicates the acceptance template; all rejected results may be shown in red.
